## Analysis has made a massive impact in professional sport and now it is set to do the same for PE lessons.

You are invited to an exclusive event, jointly hosted by AT Computers & Sportstec.

Rhys Long, number one in his field of professional sports analysis and who is head analyst for the British and Irish Lions tour, will present the latest analysis software and show what it can do for you.

He will be joined by a Welsh rugby legend who will outline why the Lions will use the technology on their tour to South Africa in the summer.

You will see how the software works in a series of interactive workshops with a Q&A session. This will be a great opportunity to see how it can be used in the school environment to:

- Capture live video
- Track pupils' performance
- Export stats for further investigation
- Make movies with footage
- Produce in-depth analysis
- Aid pupils' individual development
- Analyse sport performance in real time

Spaces are limited and allocated on a first-come first-served basis. If you would like to attend this FREE event, please contact Kath McCarthy to reserve your place on: 02920 545387 or email: [sportstec@freshwater-uk.com](mailto:sportstec@freshwater-uk.com)
